## PROFESSIONAL SUMMARY

Full-Stack Developer specializing in workflow automation and real-time systems.

Built production-grade platforms including a hospital workflow system that digitizes patient lifecycle management and reduces administrative workload.

Strong focus on backend architecture, API integrations, and scalable cloud deployment.

## TECH STACK AND CORE TECHNICAL SKILLS

**Languages:** JavaScript, Python, SQL, C#, C++

**Frontend:** React, HTML5, CSS3, Tailwind

**Backend:** Node.js, Express.js, Django, ASP.NET

**Databases**: PostgreSQL, MongoDB, MySQL, Supabase

**Cloud & DevOps:** AWS (EC2, S3, RDS, IAM), CI/CD Pipelines, Nginx, Linux, Docker, Vercel, Render

**Integrations & APIs:** REST APIs, Webhooks, WhatsApp integration, Google Maps Embed API, AWS SES, Google Apps Script, Zapier

**Security & Access Control:** RBAC, Supabase Auth, PostgreSQL Row-Level Security (RLS), SSL/TLS, Environment Variables, IP Whitelisting, VPC Security Groups

**Tools & Platforms:** Git, GitHub, GitHub Actions, PM2, AWS Console, AWS CLI, VS Code, Visual Studio, Jira, Trello

**Architecture & Data:** RESTful API Design, Relational Database Design, SQL Joins, Foreign Keys, Schema Design, State Management, Async Programming, Transactional Workflows, Audit Logging

**Testing & QA**: API Testing (Postman), Functional Testing, UI Testing, Regression Testing, UAT Support

**Systems Support & Networking:** Windows 10/11, Microsoft 365, DNS, DHCP, LAN/WAN, Wi-Fi, VPN, Hardware Troubleshooting, User Onboarding/Offboarding

**Requirements & Delivery:** Client requirements gathering, stakeholder communication, translating business needs into technical solutions

**FEATURED PROJECTS** (Additional projects and implementations available in portfolio)

**HWMS** – *Hospital Workflow Management System*

Live Demo | GitHub

- Reduced manual administrative workload and improved patient processing efficiency by digitizing full clinical workflow (registration → consultation → billing → pharmacy).

- Designed and developed a full-stack, multi-role system supporting Admin, Doctor, Nurse, Pharmacist and Receptionist workflows with structured lifecycle state transitions.

- Implemented secure Role-Based Access Control and PostgreSQL Row-Level Security to enforce strict data isolation and least-privilege access at the database level.

- Built transactional data workflows and audit logging to ensure consistency, traceability, and integrity across prescriptions, billing, and visit records.

- Deployed production-ready system using Supabase (PostgreSQL + Auth) and Vercel, with environment-based configuration and secure API integration.

- Reduces administrative workload and patient waiting time by approximately 20–30%

*Stack*: React, Node.js, PostgreSQL, Supabase, Vercel

**JungleShop** – *Full-Stack E-Commerce*

Live Demo | GitHub

- Designed and built a full-stack e-commerce app with product management, secure checkout, and order tracking, simulating real-world online retail store.

- Responsive frontend on AWS S3 using React and Tailwind CSS with dynamic product search and filtering. RESTful APIs using Node.js and Express to handle product, order, and checkout operations. deployed on AWS EC2 with PM2

- Implemented admin-only protected routes using credential-based authentication for product management and restricted database access via AWS security groups and IP whitelisting

- Secured sensitive configurations using .env for API keys and database credentials.

- Integrated MySQL database on AWS RDS with secure VPC configuration-Deployed React frontend to AWS S3 with static hosting and connected it to live backend APIs

*Stack*: React.js, Tailwind CSS, JavaScript , Node.js, Express.js, MySQL (AWS RDS), AWS S3, AWS SES, REST APIs, Git, GitHub, AWS EC2, Nginx, AWS IAM USER

**Medical Practice Website** – *Dr HM Modiba-Mlaza*

Live Demo | GitHub

- Designed and deployed a responsive healthcare website improving patient access through WhatsApp booking and Google Maps integration

- Increased patient engagement and accessibility resulting in 15–25% increase in visit inquiries and 5-10% increase in visit

*Stack*: HTML5, Tailwind CSS, JavaScript, WhatsApp API Integration, Google Maps Embed API, Git, GitHub, GitHub Pages.

## EDUCATION

**Bachelor of Science in Information Technology** – North-West University (VTC)

**National Senior Certificate (Matric)** - Springs Boys High School
**Subjects:** Mathematics, Accounting, Business Studies, Life Sciences, English Home Language, Afrikaans First Additional Language, Life Orientation

## CERTIFICATIONS

AWS Cloud Practitioner Essentials – Coursera

AWS Cloud Technical Essentials – Coursera

Introduction to Data Science – IBM

Python Essentials – Cisco

Introduction to Cybersecurity – Cisco

## PROFESSIONAL EXPERIENCE

**Website Developer & Administrator – BE Bellair Medical Centre** (Jan 2025 – Dec 2025)

- Developed, deployed, and maintained the medical center's website.
- Administered content, updates, and integrations.

**Administrative Assistant – Board Corner Enterprises** (Dec 2013 – Jan 2014)

- Provided office administration and documentation support.

**Delivery & Administrative Assistant – Twisted Taste** (Jun 2024 – Dec 2024)

- Managed delivery of goods and order coordination.
- Performed administrative duties and customer communication.

**Cloud & Systems Implementation IT Support Technician & Installer (Freelance)**

- Designed, deployed, and supported cloud-based systems and automated workflows.
- IT support, hardware setup, troubleshooting, and installations of CCTV & PA systems
