PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications and workflow automation systems. Developed responsive user interfaces and backend services using modern JavaScript frameworks and RESTful APIs. I'm also experienced in delivering production-grade applications with a strong focus on code quality, system reliability, and continuous improvement. Collaborative team player with a strong foundation in software development practices, version control, and agile workflows. Currently upskilling in Angular and TypeScript to keep up with the wave. Eager to contribute and grow.

TECH STACK

Languages: JavaScript, Python, SQL, C#, C++, Java

Frontend: React, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django, ASP.NET

Databases: PostgreSQL, MySQL, Supabase, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, IAM), CI/CD Pipelines, Nginx, Linux, Docker, Vercel, Render

Integrations & APIs: REST APIs, JSON, Webhooks, WhatsApp integration, Google Maps Embed API, AWS SES, Google Apps Script, Zapier

Security & Access Control: RBAC, Supabase Auth, PostgreSQL Row-Level Security (RLS), SSL/TLS, Environment Variables, IP Whitelisting, VPC Security Groups

Tools & Platforms: Git, GitHub, GitHub Actions, GitHub Copilot, PM2, AWS Console, AWS CLI, VS Code, Visual Studio, VirtualBox, Jira, Trello, BlueJ, Arduino, Scratch

Architecture & Data: RESTful API Design, Relational Database Design, SQL Joins, Foreign Keys, Schema Design, State Management, Async Programming, Transactional Workflows, Audit Logging

Testing & QA: API Testing (Postman), Functional Testing, UI Testing, Regression Testing, UAT Support, Unit Testing (basic exposure)

TECHNICAL COMPETENCIES

Technical Support: Hardware Diagnostics, Software Installation, Help Desk Support, Issue Resolution, User Onboarding/Offboarding

Data & System Support: Data entry, system documentation, reporting support, basic system auditing, Microsoft 365

Networking: Network Operations, LAN/WAN, DNS, DHCP, Wi-Fi, System Configuration

Security: Cybersecurity Fundamentals, Secure Configuration, Risk Awareness

Operating System: Windows, Mac, Linux (Ubuntu) ,

Requirements & Delivery: Client requirements gathering, stakeholder communication, translating business needs into technical solutions

Development Practices: Agile/Scrum methodology, Git workflows, code collaboration, debugging and testing

Core Strengths: Analytical Problem-Solving, Technical Communication, Customer Support, IT Service Delivery

FEATURED PROJECTS

HWMS – *Hospital Workflow Management System*

[Live Demo](#) (click Hyperlink to view live demo)|

[GitHub](#) (click Hyperlink to view GITHUB repo)|

- Reduced manual administrative workload and improved patient processing efficiency by digitizing full clinical workflow (registration → consultation → billing → pharmacy).
- Designed and developed a full-stack, multi-role system supporting Admin, Doctor, Nurse, Pharmacist and Receptionist workflows with structured lifecycle state transitions.
- Implemented secure Role-Based Access Control and PostgreSQL Row-Level Security to enforce strict data isolation and least-privilege access at the database level.
- Deployed production-ready system using Supabase (PostgreSQL + Auth) and Vercel, with environment-based configuration and secure API integration.
- Reduces administrative workload and patient waiting time by approximately 20–30%

Stack: React, Tailwind CSS, JavaScript , Node.js, PostgreSQL, Supabase, Vercel

JungleShop – Goods Sales Online Store

[Live Demo](#) (click Hyperlink to view live demo)

[GitHub](#)(click Hyperlink to view GITHUB repo)

- Designed and built a full-stack e-commerce app with product management, secure checkout, and order tracking, simulating real-world online retail store.
- Responsive frontend on AWS S3 using React and Tailwind CSS with dynamic product search and filtering. RESTful APIs using Node.js and Express to handle product, order, and checkout operations. deployed on AWS EC2 with PM2
- Implemented admin-only protected routes using credential-based authentication for product management and restricted database access via AWS security groups and IP whitelisting
- Secured sensitive configurations using .env for API keys and database credentials.
- Integrated MySQL database on AWS RDS with secure VPC configuration-Deployed React frontend to AWS S3 with static hosting and connected it to live backend APIs

Stack: React.js, Tailwind CSS, JavaScript , Node.js, Express.js, MySQL (AWS RDS), AWS S3, AWS SES, REST APIs, Git, GitHub, AWS EC2, Nginx, AWS IAM

Medical Practice Website – Dr HM Modiba-Mlaza

[Live Demo](#) (click Hyperlink to view live demo) | [GitHub](#)

- Designed and deployed a responsive healthcare website improving patient access through WhatsApp booking and Google Maps integration
- Improved accessibility resulting in an increase in patient inquiries by approximately 15–25% and in-person visits by 5–10%

Stack: HTML5, Tailwind CSS, JavaScript, WhatsApp API Integration, Google Maps Embed API, Git, GitHub, GitHub Pages.

EDUCATION

Bachelor of Science in Information Technology – North-West University (VTC)

National Senior Certificate (Matric) - Springs Boys High School

Subjects: Mathematics, Accounting, Business Studies, Life Sciences, English Home Language, Afrikaans First Additional Language, Life Orientation

CERTIFICATIONS

AWS Cloud Practitioner Essentials – Coursera

AWS Cloud Technical Essentials – Coursera

Introduction to Data Science – Cisco Networking Academy

Python Essentials 2 – Cisco Networking Academy

Introduction to Cybersecurity – Cisco Networking Academy

PROFESSIONAL EXPERIENCE

Website Developer & Administrator – BE Bellair Medical Centre (Jan 2025 – Dec 2025)

- Developed, deployed, and maintained the medical center's website.
- Administered content, updates, and integrations.

Administrative Assistant – Board Corner Enterprises (Dec 2013 – Jan 2014)

- Provided office administration and documentation support.

Delivery & Administrative Assistant – Twisted Taste (Jun 2024 – Dec 2024)

- Managed delivery of goods and order coordination.
- Performed administrative duties and customer communication.

Cloud & Systems Implementation IT Support Technician & Installer (Freelance)

- Provided first-line IT support, troubleshooting hardware and software issues for end users
- Installed and configured systems including networking setups, CCTV, and PA systems
- Assisted with system maintenance, configuration, and issue resolution in operational environments
- Designed, deployed, and supported cloud-based systems and automated workflows.
- Installations of CCTV & PA systems

ABOUT ME

I am a naturally curious and driven individual with a strong problem-solving mindset and a deep interest in understanding how systems work. I enjoy breaking down complex problems into smaller components and analysing how they interact to find practical and efficient solutions. This way of thinking extends beyond software into real-world scenarios, where I am able to apply logical reasoning and technical understanding to unfamiliar challenges and adapt quickly.
