BENEDICT DE ALMEIDA MZIZI

FULL-STACK SOFTWARE DEVELOPER

Johannesburg, Gauteng, South Africa | 079 724 9199 | bennydrizi@gmail.com

LinkedIn: https://linkedin.com/in/benedict-mzizi | Portfolio: https://benedictmzizi.github.io/OnlineResume | GitHub: https://github.com/BenedictMzizi

PROFESSIONAL SUMMARY

Full-Stack Software Developer experienced in designing, building, deploying and maintaining web applications and business management systems. Develops modern frontend applications and backend services using React, Angular, TypeScript, Java, C#, Spring Boot, ASP.NET Core and relational databases. Experienced in translating business requirements into practical software, designing database schemas, building REST APIs, implementing authentication and role-based access control, integrating third-party services, and troubleshooting cloud-hosted applications. Comfortable contributing across the software development lifecycle, from requirements and architecture through implementation, testing and deployment.

TECHNICAL SKILLS

Languages: Java, C#, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Angular 19+, HTML5, CSS3, Tailwind CSS, Vite

Backend: Spring Boot, Spring Security, ASP.NET Core (.NET 10), Node.js, Express.js, Django, Spring Data JPA, Hibernate, Entity Framework Core

Databases: PostgreSQL, MySQL, Neon PostgreSQL, Supabase, MongoDB; relational modelling, schema design and transactional data

Cloud & DevOps: AWS EC2, S3, RDS, IAM, Vercel, Render, Docker, Nginx, Linux, GitHub Actions, CI/CD, PM2

Security & APIs: REST API design, JWT, authentication and authorisation, RBAC, PostgreSQL RLS, Webhooks, secure configuration

Tools & QA: Git, GitHub, Postman, VS Code, Visual Studio, Jira; API, functional, UI and regression testing, debugging

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Upper Level Group | *2026 – Present | Johannesburg, Gauteng*

Contributing to the design, development and maintenance of software applications and digital solutions, working across frontend architecture, backend services, database systems, application security and deployment. Specific company project details are confidential.

- Developing responsive frontend interfaces and application workflows using React, TypeScript and Tailwind CSS.
- Designing, developing and integrating backend services and RESTful APIs using Java, Spring Boot and PostgreSQL.
- Implementing authentication, JWT-based security and role-based access control using Spring Security.
- Designing and maintaining relational database structures, entity relationships and data persistence using Spring Data JPA and Hibernate.
- Integrating frontend applications with backend APIs and implementing application-level business logic.
- Contributing to application security, access permissions, input validation and data integrity.
- Developing reusable application components, modular services and maintainable software architecture.

Website Developer & Administrator | BE Bellair Medical Centre | *2025*

- Developed, deployed and maintained the medical centre website; managed content updates, maintenance and integrations.
- Managed website content, updates, maintenance and third-party integrations.
- Improved accessibility of practice information and digital patient engagement.

Delivery & Administrative Assistant | Twisted Taste | *2024*

- Coordinated deliveries, order processing and customer communications while supporting daily administrative operations.

Administrative Assistant | Board Corner Enterprises | *2014*

- Provided office administration, documentation and general operational support.

Freelance IT Support & Technical Services

- Provided first-line IT support, PC repairs, hardware diagnostics, software installation and troubleshooting.
- Installed and configured computer systems, networking equipment, CCTV and public address systems.

FEATURED SOFTWARE DEVELOPMENT PROJECTS

1. HWMS – Hospital Workflow Management System

Full-Stack Healthcare Management Platform

Live demo: https://clinical-system-orpin.vercel.app | **GitHub:** https://github.com/BenedictMzizi/clinical-system

Designed and developed a healthcare workflow platform to digitise and integrate clinical and administrative operations across clinics and hospitals.

- **Platform architecture:** Designed a multi-facility system intended to support separate facility staff, patient records, wards and operational data.
- **Patient and reception workflows:** Built patient record management, appointment scheduling, arrival lookup and reception workflows.
- **Clinical operations:** Implemented role-specific nursing and doctor workflows, including vitals recording and consultations.
- **Ward and admissions management:** Developed ward and bed management workflows covering bed allocation, admissions, transfers, discharges and occupancy tracking.
- **Diagnostics and pharmacy:** Built digital diagnostic request workflows spanning radiology and laboratory operations, alongside pharmacy workflows.
- **Billing and payments:** Implemented billing, payment recording, receipts and refund workflows, including controlled refund processing and idempotent payment handling.
- **Security and data integrity:** Implemented role-based permissions and facility-scoped access, supported by relational data structures, SQL workflows and auditability considerations.

Technology: React, JavaScript, Tailwind CSS, Supabase, PostgreSQL, SQL, Vercel.

2. JungleShop – Full-Stack E-Commerce Platform

E-Commerce Application & Architecture Modernisation

Live frontend: https://jungle-shop.vercel.app/ | GitHub: https://github.com/BenedictMzizi/jungleShop

Modernising an existing e-commerce application toward a modular Angular frontend, ASP.NET Core backend and Neon PostgreSQL data platform.

- **Application modernisation:** Evolving an existing e-commerce application toward a modular Angular frontend and ASP.NET Core backend architecture.
- **Shopping experience:** Product catalogue with search, filtering and pagination, plus persistent shopping-cart functionality.
- **Customer identity:** Integrated Neon Better Auth for customer registration, login and email verification.
- **Backend and data:** Developing RESTful services in C#/.NET 10 with Entity Framework Core and Neon PostgreSQL for product and order data.
- **Administration and integrity:** Building protected product-management functionality and using integer minor currency units to avoid floating-point precision issues.

Technology: Angular 19+, TypeScript, C#, ASP.NET Core (.NET 10), Entity Framework Core, Neon PostgreSQL, Neon Better Auth, AWS S3, REST APIs.

3. Medical Practice Website – Dr HM Modiba-Mlaza

Live demo: https://benedictmzizi.github.io/drModibaWebpage| GitHub: https://github.com/BenedictMzizi/drModibaWebpage

- Designed and deployed a responsive healthcare website, integrating WhatsApp appointment enquiries and Google Maps to improve patient access and communication.

Technology: HTML5, Tailwind CSS, JavaScript, WhatsApp integration, Google Maps Embed API, GitHub Pages.

EDUCATION

Bachelor of Science in Information Technology | North-West University (Vaal Triangle Campus) — Completed
National Senior Certificate (Matric) | Springs Boys High School — Completed

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – Coursera
- Python Essentials 2 – Cisco Networking Academy
- Introduction to Cybersecurity – Cisco Networking Academy
